Worldwide Cyber Events

Michelle Fielding

Worldwide Cyber Events – Michelle Fielding

https://rumble.com/v7a3biy-worldwide-cyber-events.html 77m 5-19-2026

I am going to be looking at the benefits of the new worldwide shutdown of communications and banking.
Is there going to be a blackout, what might be the cause of it, who might be involved.
I am also going to be looking at what is happening with these missing scientists that seem to be going missing around the world.
I am also going to be talking about the progress of the worldwide Military Peace Plan and I am also going to have a stab at trying to explain to everybody the difference between time travel and teleportation so that's going to be interesting so I hope you really enjoy everything and let's just get started.
So I wanted to start today by looking at this article that I found from the *Independent* where it was saying that criminals could hijack thousands of devices to create a never before seen cyber weapon. The article goes on to say that criminals have secretly hijacked more than 14,000 devices worldwide in order to carry out attacks that are almost impossible to protect against.
The majority of devices infected by the sophisticated new malware dubbed KadNap are ASUS routers which are being used to route malicious traffic to carry out large-scale cyber-attacks. Details of the KadNap botnet were shared by the cyber security firm Lumen in a new report which revealed that it is using a decentralized peer-to-peer system to avoid network detection.
A botnet is created by compromising the security of internet-connected devices which can range from routers to smart fridges. These devices are then covertly hijacked and linked together to carry out distributed denial of service, DDOS attacks which overwhelm websites and online services with traffic to knock them offline. As modern society increasingly relies on internet-exposed internet of things that IOT devices then the opportunities for malicious actors to exploit vulnerabilities continue to abound.

Threat actors are building large-scale botnets specifically designed to hijack devices in this growing pool of targets using them to route traffic and evade detection by network security systems. The majority of KadNap victims are located in the US. Those security researchers have identified infected devices in the UK, Australia, Brazil, Russia and across Europe. For the average owner of an ASUS router infected with KadNap the malware would be undetectable beyond internet speeds feeling slightly sluggish at times. Its decentralized design means there is no central server that could be easily shut down by law enforcement making the KadNap botnet incredibly resilient to attempts to dismantle it.

Using traffic from household routers means that the attackers can bypass conventional security filters as it looks like the traffic is coming from the average person browsing the web. Their intention is clear, avoid detection and make it difficult for defenders to protect against. KadNap spots are sold through doppelganger, a service whose users leverage these hijack devices for a range of malicious purposes including brute-force attacks and highly targeted exploitation campaigns.

As a result every IP address associated with this botnet represents a significant persistent risk to organizations and individuals alike. So when I found this article it was timely because I had recently had a vision where it felt like an AI virus is going to rapidly go around the world and cause some kind of world-wide shutdown. So I thought I would look at that today as one of our topics.

So I asked **Is an AI event like an AI virus going to shut down the world?** They said “No, not an AI virus, but a coordinated attack will take down a lot of corporate organizations and those charities, governments and institutions that are not lined up with the Worldwide Military Peace Plan.

And I said **What will the organized attack look like?** They said “It will look like a cyber-attack sometimes affecting infrastructure and in some cases entire countries. These attacks are planned and will be targeted to specific groups, organizations, societies and institutions etc who going forward don't fit into the protocols or doctrines of the Worldwide Military Peace Plan.

Essentially all regions must establish peace to their citizens and establish peace towards the other regions. Peace comes in many layers, financial, technological, environmental and societal and where a region is not actively working within the peace protocols firstly towards its citizens and then towards other nations, then it will be halted."

So, I said, **Are we saying that the cyber-attacks will permanently disable regions?** And they said "In some cases yes, but essentially, the targeted plan is more about removing the bad players permanently."

So I said, **So what will these cyber-attacks look like in real terms and will they happen on a global scale?** They said, "They will occur in layers, dependent on the level of critical security which is being breached within the Worldwide Military Peace Plan."

And I said, **What is considered critical?**

They said "Any system which is likely to disrupt the redistribution of wealth to humanity will essentially be halted permanently."

So I said, **Will some of the big tech players collapse?** And they said "Yes."

And I said, **Are any of the players surrounding the Q financial system implicated?** And they said "No."

So I said **Essentially the tech teams that we see around the Q financial system which includes the cyber layers like stargate, golden dome, SpaceX, Starlink, Space Force?**

"These layers are not included in the shutdown or the shutdown or the disabled plan. On the whole the teams currently in view have been vetted and are cleared, but not all of them."

So some big players will be disabled by the tech outages, the cyber-attacks and the AI viruses.

Will there be one global event linked to a cyber-outage or attack or an AI attack or virus?

And they said "Not exactly, but regions will experience outages over the next two to three years as they implement the Q Financial System."

I said, **What are the sectors that will be targeted so that they are disabled, will it be AI?**

They said “In some cases, yes.”
Will it be financial?
They said “YES!”
So I said, **Is it going to be the banks?**
They said “That's already completed.”
I said, **Is it going to be cryptocurrency?**
They said “That's ongoing.”
I said, **Is it going to be crypto platforms?**
They said “That's ongoing.”
I said, **Is it going to be the government?**
They said “YES!”.
I said **Central government.**
They said “YES!”
Local government? again, “YES! The biggest area of reform is going to be the government layers. And the next step is to switch them all to AI. Governments that are not lined up with the World Wide Military Peace Plan will be disabled. And the essential services will be disabled and replaced.”
And I said, **Do you mean the people in power or do you mean the tech and the bureaucracy will be disabled and replaced by AI?**
And they said “Everything will be overhauled. Most government structures will be overhauled to run on AI platforms and financial systems will switch to the cryptocurrency.
As jobs within the government and financial sectors reduce because of automation and AI, then a birthright income will be introduced.
So I said **In real terms, how is it going to look for people day to day?**
They said that “The new financial system will make the whole world more prosperous over the next five to ten years and the normal nine to five job will go and people will work more for passion rather than for survival or for the outdated rat race.
Education will also change and homeschooling will become more popular as well Montessori and Steiner Educational Establishments and Communities where decision making is made at the personal and group level and not at the government level.

So I said **The cyber plans to disable the bad players who are still not within the worldwide military peace plan frameworks, how is it going to look? How are these cyber plans going to look?**
They said “The plan is layered and it's layered to attack and disable organizations, banks, companies, infrastructure and governments in different ways and it might involve removing or disabling key personnel as we've seen with Maduro in Venezuela.
It might also involve AI viruses that disable government or corporate infrastructure. In the case of the government infrastructure, it will affect citizens. For example, it could affect electricity, power lines and telecommunications. So it is being planned carefully so that the citizens are not put into unnecessary danger.
Those governments signed in to the worldwide military peace plan will already have installed or be in or be installing backup procedures, protocols and systems. For example, there may be an emergency switch to solar where it is possible. So, for example, this may happen in the Mediterranean. The military forces and police forces will be actioned immediately to assist with real time demands on the ground, including setting up and securing emergency communities, hospitals, for the elderly and vulnerable.”
I said, **Are we likely to see this on a global scale all at once?**
And they said “Not exactly, layers will be implemented simultaneously, but not necessarily causing one big worldwide blackout. It is more likely that one military region may be targeting, say, the deep underground military bases, whilst another military region is targeting or dismantling bad player organizations.
And this will be through cyber warfare, which can in some cases look like a rogue AI virus.
Each region will be assigned different tasks at a different time. And this is now fully in action.
Things will escalate and move quickly with regards to disabling networks worldwide using cyber-outages and AI viruses.”
And I said, **Will these attacks be land-based or space-based?**
And they said “It will be both depending on what needs to be achieved. Technology in space like SpaceX, Golden Dome, Starlink, Star shield and Space Wars will be used to disable and monitor

governments on the whole to see if they are adopting the protocols of the worldwide military peace plan.
Technology in space is mirrored worldwide. So it won't just be the USA Board of Peace engaging in this cleaning activity. This is all military in terms of oversight. Essentially each region, organization and society must fall into place under the worldwide military peace plan or risk becoming disabled or disbanded through some form of technological attack."
I asked them, **The players we see around Trump at this time, particularly with regard to AI technologies, will they remain?**
They said, on the whole, the players we currently see around the technological changes in the USA sector of the worldwide military peace plan will remain, but integrity of leaders is continuously being assessed. What they're looking for, it is there aim to serve humanity or is it for personal gain and recognition?
Those showing integrity, morality and God, they will be favored. Their true intentions are already known by the Galactic Federation of Light, so they can't mask their intentions or their strategy with pretty words or slogans.
Everything is already known and seen both by God and the Galactic Federation and as frequency continues to become finer and purer as we move towards the Golden Age and the age of love, then any false intentions are not only just known, but they will be halted.
People and organizations will be put into situations to test their integrity, their morality and their heart connection to Source, irrespective of whether they profess allegiance to God or not.
The intention is always known by the frequency of the spiritual heart. The spiritual heart can never be overcome by technology or programming or societal demands. A spiritual heart just is."

So around the time that I was having this vision of the AI virus going worldwide, there was also a lot of talk of scientists being taken around the world or suddenly committing suicide or being found dead. And I was being shown there was a connection to how all these scientists were going missing in different regions. And I was

given a vision that they might have been all taken somewhere to be working on something.
And I was being shown that they were being taken to what they were saying to me was a new civilization. I was hearing “a new civilization.”

So I said, **Please can you tell me, is there a new civilization or community area that's being set up for high vibrational servants of God?** And they said “Yes.”
And I said, **Is this where our worldwide scientists are now residing?** And they said “Yes.”
And I said, **What is the purpose of this at this time? Collectively, what does their skill set offer?**
And they said “Collectively, these quantum scientists and light workers, they know how to work with the energy grids in a way that can accelerate time and increase collective consciousness.”
And I said, **Doesn't that go against spiritual law or divine will?**
They said to me that “In the past, this would have been the case, but now, we have a cohort of high vibration beacons of light. You are indeed one of them, the collective petitioning of the beacons of light to God, to the God's Source, for humanity to reach the Golden Age, the age of love has now created a divine dispensation.
So this is the same thing that happened in 1987 at something called the Harmonic Convergence. Now the harmonic convergence was an organized worldwide meditation where everybody meditated on the same day and at the same time. And they put out their request to the God's Source for an increased vibration in collective consciousness and at that point, the God's Source gave a divine dispensation and it was allowed and so the ascension of the planet Earth began.”

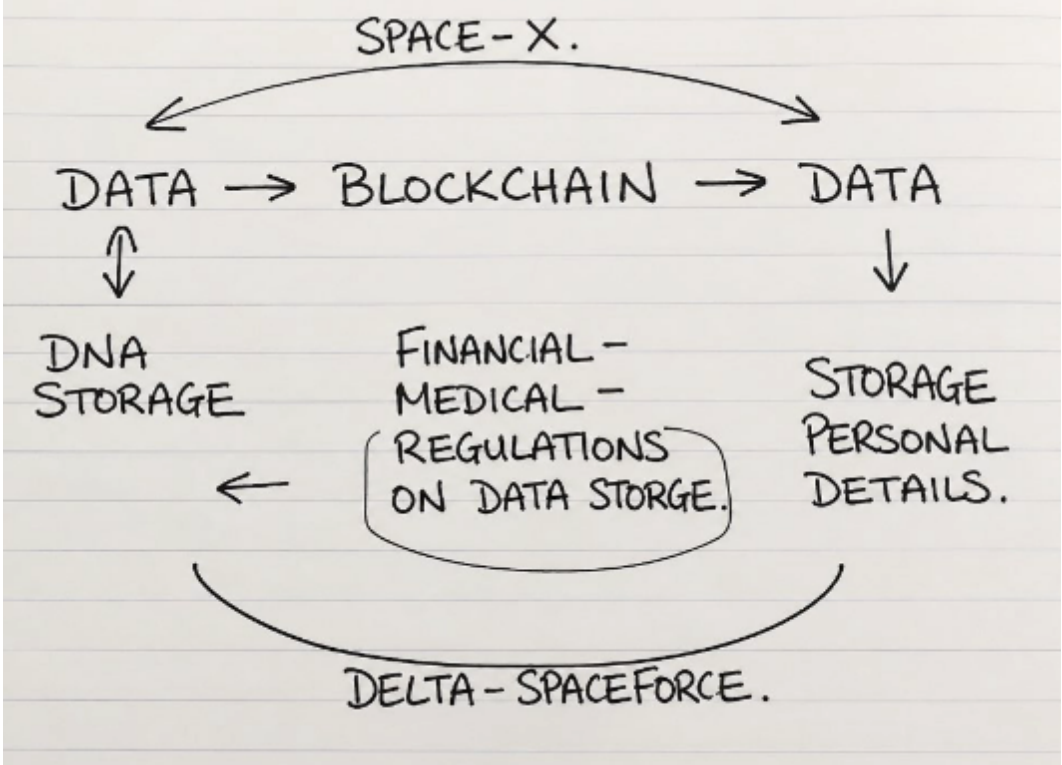
So what they're saying to us is that because all the beacons of light, the light workers have been consistently meditating, they've been working on their spiritual heart, they've been following divine law, that this is now created a collective wave, if you like, that's gone out to the God's Source and a divine dispensation has again been allowed, meaning that if the scientists and others are now wanting to try and

increase the collective consciousness using technology, then it looks like it may have been allowed.
They said “The group being collected worldwide, the men and the women who are the beacons of light, they will now focus their intentions in each quadrant on securing the grids, the matrix of light, the matrix of love.”
So I asked them **What are the locations of these high vibrational cohorts, are they near Stargates?**
And they said “Yes, they are positioned in military regions where the veil is thin and interdimensional travel and communication is either heightened or easier to access. A military team of spiritual and technological people are now assembled and through the use of quantum teleportation and time technologies, combined with high frequency beings and the scientists, then the grids will now be pumped with higher vibrational frequencies and this is all being overseen by the Galactic Federation of Light.”
I said **Is there one specific event where these higher vibrational frequencies will be switched on in one big pulse creating a reset as such.**
And they said “Yes, that is correct.”
And I said **How is this going to look to the public?**
They said “It is likely going to be an event which closes down the old communication systems and frequencies and this may take several days.”
And I said to them **Will it result in a worldwide, a complete worldwide silence?** And they said “Yes.”
And I said **Do you mean that all communications will be shut down?** They said “Yes, for the public.”
And I said **What will the public perceive the reason to be for all of this?** And they said “There will be various storylines or converging at once. They might think there's war, technological outages, AI virus internationally and power outages. Many storylines will converge all at once and then the switch will occur.”
As to **When the power comes back on will it all look the same?**
And they said “Yes and no.

Some systems will not reboot. Some dark players, corporations, organizations, charities and governments will not come back on in the same way. Some will be dismantled, disbanded and unable to trade going forward. The quantum switch combined with the higher consciousness will render them disabled and unable to regain momentum. They'll be redundant.
The dark energies that had been able to work through these old structures either financially or psychologically, they will be disabled and they will no longer be able to run on the higher consciousness networks and gridlines. They will glitch and in some cases just burn out and some of them will just never revive themselves. The new systems will be protected and overseen by the Galactic Federation of Light, below that space X, the Golden Dome and Starlink. This is also going to be coordinated with Space Force Delta."
I said **How many days will the switch over to the quantum communications actually take?**
They said "It is anticipated that it will take *between three to four days* and it is requested formally from the Galactic Federation that all beacons of light now merge their consciousness and set their intentions to aid this massive leap in consciousness collectively to hold their intentions strong for peace on Earth for union in mind, body and soul for the collective that they integrate and align easily and effortlessly."

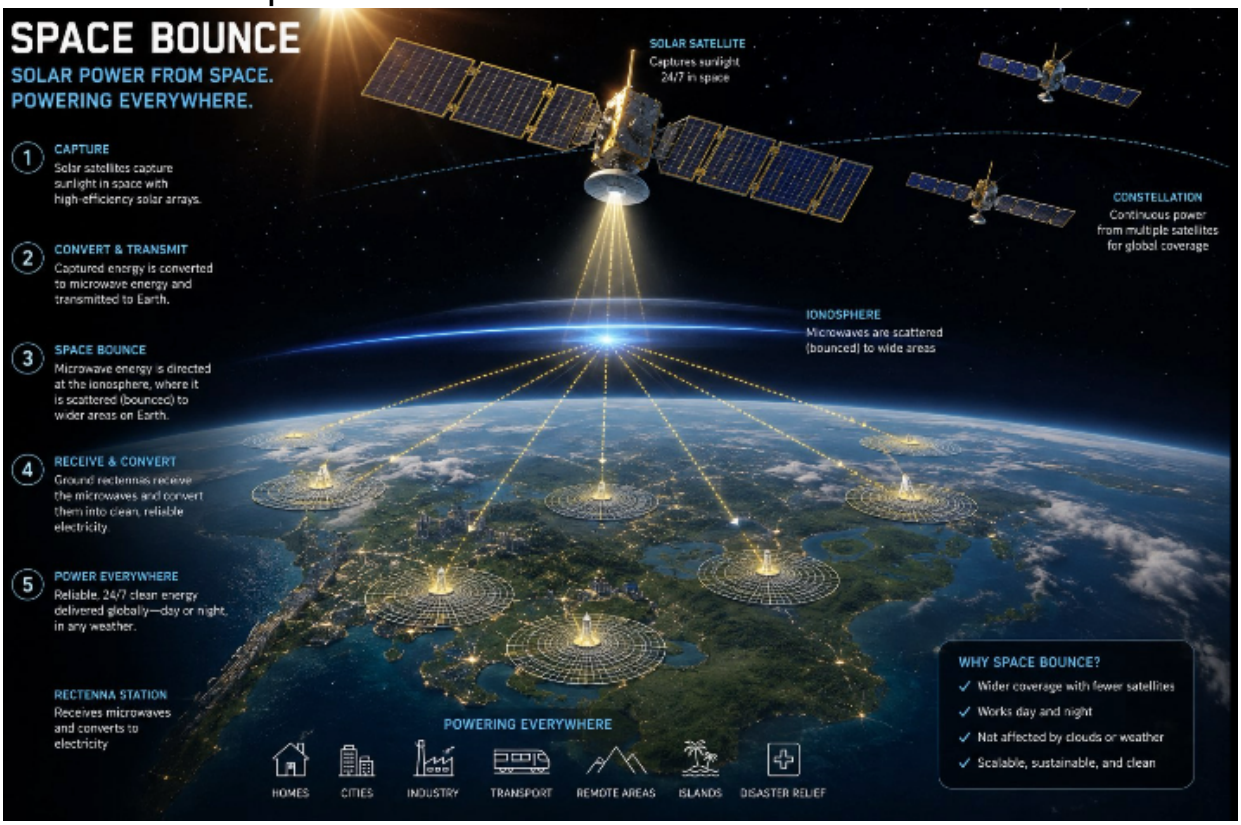
I will shortly be announcing a date for the activation of the Golden Heaven on Earth consciousness. This coincides with the release and the pre-sales of my Oracle deck called Golden Heaven on Earth Oracle.
If you are interested in joining me for the Worldwide Activation of Golden Heaven on Earth consciousness, please come across to my website at goldenheavenonearth.net and subscribe so that you will receive any updates regarding the date and the release of the activation of the Golden Heaven on Earth consciousness. I will be announcing a date for the activation of the activation day and the Oracle deck.

I said **Is the Musk Space X layer and the plans for solar in space, is this to secure the cybersecurity layers in space?**
They said “Yes, and also to power the data centers.”
I said **Will and does the Starlink and Starship Network run also on DNA entanglement via X-DNA for the Q Financial System?**
They said “In this moment it is being prepared to run the Q financial system via the X-DNA protocols, yes, but initially it is being trialed on the military and government personnel and some staff within SpaceX, X.com and X money. The system is not yet fully operational or secured for the public.”
I said **What are they waiting on?** They said “Legislation and protection of data is being finalized and they need to know where the data is stored and who has access to it and its security.”
I said **What happens if our DNA was claimed and is that possible?** They said in theory that is possible. A decentralized system can code each stage and each strand of the DNA structure per individual. The blockchain is not the area of vulnerability. It is more how the organic data is stored and recorded at the front and the back end of the process. There is vulnerability at the data storage points only.”



If you look at this diagram we have got SpaceX overseeing everything at the top and then you can see to the left you have got your data which is where your DNA is stored.
Then it would go through the blockchain. It could be something to do with your finances or something medical.
Then at the far end that produces more data and this data needs to be stored. This is where it would then store the personal details about you. What we are waiting on is the regulations on how this data is stored either at the front end or the back end. SpaceX and Delta Space Force cocoon this process at the moment to try and keep that information secure."
I said **The solar plans for generating power, is this for the data centers that will hold the personal data of the X DNA?**
"In some cases, yes, but the solar energy grab is more for infrastructure, on the whole, keeping everything going in the event of a cyber-attack on the infrastructure which supplies electricity, communications, banking or military communication."

I said **Is the solar energy for the military setup or for the public or government infrastructures?** They said “It's for all the above and it's also to power homes.”



SPACE BOUNCE
SOLAR POWER FROM SPACE.
POWERING EVERYWHERE.
SOLAR SATELLITE
Captures sunlight 24/7 in space
1 CAPTURE
Solar satellites capture sunlight in space with high-efficiency solar arrays.
2 CONVERT & TRANSMIT
Captured energy is converted to microwave energy and transmitted to Earth.
3 SPACE BOUNCE
Microwave energy is directed at the ionosphere, where it is scattered (bounced) to wider areas on Earth.
4 RECEIVE & CONVERT
Ground rectennas receive the microwaves and convert them into clean, reliable electricity.
5 POWER EVERYWHERE
Reliable, 24/7 clean energy delivered globally—day or night, in any weather.
CONSTELLATION
Continuous power from multiple satellites for global coverage
IONOSPHERE
Microwaves are scattered (bounced) to wide areas
RECTENNA STATION
Receives microwaves and converts to electricity
POWERING EVERYWHERE
HOMES
CITIES
INDUSTRY
TRANSPORT
REMOTE AREAS
ISLANDS
DISASTER RELIEF
WHY SPACE BOUNCE?
✓ Wider coverage with fewer satellites
✓ Works day and night
✓ Not affected by clouds or weather
✓ Scalable, sustainable, and clean

So my understanding is that there are satellites in space that are able to harness the solar energy and this solar energy can then be used to power the data centers or the power grids.
I'm wondering if the channeling I had a couple of years ago called *The Bounce* where I talked about HOW SpaceX were developing satellites where they were harnessing power that could be balanced from one satellite to the next. I'm wondering if that was what I was seeing at that time. At that time I was talking about toroid energy being taken from space and being used to power them to power the satellites.
But now it seems it was actually the solar power that they're harnessing to power these satellites and that through a system of bouncing that power, either to each other or to Earth, they're now able to power the data centers.

So I asked them **In order to run quantum entanglement for the X-DNA will it just be blood or other elements of our organic body, mind or soul that they can access?**
And they said “Yes, all of the above. The X-DNA is essentially the starting point of consciousness ID at the organic level and the other elements will be added like brain patterns or waves and heart-magnetic code in the subtle bodies of the auric field.”
I said **Will our subatomic signature be used for the X-DNA?** They said “No, not yet. The infrastructure for subatomic reading of our consciousness like the Merkaba which is our light body or frequency is still being developed in the background, so that it can go to scale.”
I said **The scripts around going to the moon, the moon shot. What is that all about?** They said to me that “All the scripts around the moon are a way to help the general public to expand their thinking and their consciousness. It is a project of training collective consciousness to expand and to create neuroplasticity so they start thinking upwards and outwards and they start to think outside of their normal daily pattern. Expanded consciousness or neuroplasticity is required for the collective consciousness to adapt. It needs to be able to throw its conscious awareness further away from the body so that the new consciousness technology and consciousness ID can read it more easily. Expanded consciousness is finer and purer in frequency so it reaches further.”
So while we are sort of focusing on the moon I said to them **Are aliens real?** They said “Yes.”
And I said **Are they interdimensional?** They said “Yes.”
And I said **Can they click themselves?** They said “Yes.”
And I said to them **Generally I only see interdimensional as human, like Commander Ashtar.**
And they said “This is because you vibrate higher than alien life forms as you have a different dimension and frequency to stabilize. I'm stabilizing cosmic levels and need a broader overview.”

So recently when I was working on these notes actually they suddenly got me to stand up and connect. They do that to me quite often. And as I was connecting they showed a version of me on a

Galactic Federation ship. And so they've done that many times before, but this time they showed me looking down upon myself in the earthly realm. And what they were showing me was that in the past I had oversight of Earth. So when I've been taken up and over in the past it's usually being to show me that I need to put healing over the Earth and to hold it in my hands, like to hold the grids, but this time they showed me that my position had changed.
So now instead of overseeing Earth I was now part of a team of people that are overseeing the cosmic aspect, the cosmos. So I'd had like a spiritual promotion, it would seem. And in this vision or in this experience that I was having I was flooded with energy all over my body.
And I could see the version of me on Earth I was looking down at myself, of me here right now. And what it was showing me was that this cosmic level of myself within the Galactic Federation.
I was able to see this version of myself on a daily basis and I was able to guide me. So I know this sounds a little bit confusing, but I'm able to look down upon myself from the Galactic Federation.
And so this ability to see myself from a higher perspective, it was showing me that I'm being guided by that version of me in the Galactic Federation. So obviously I have connection to Source which is another layer again above the Galactic Federation of Light. So this is showing quite clearly how we are multi-dimensional.

So they said to me that “You have the God consciousness frequency. You have the Christ consciousness frequency and then you have the Galactic Federation of Light frequency and that is generally where the aliens can be seen.”
So I said to them **So I was saying that aliens vibrate at a slower denser frequency to say God consciousness or Christ consciousness.**
And they said “In some cases yes, but not all. Some aliens also vibrate at the frequency of God consciousness and commander Ashtar is one that vibrates at the cosmic level and so he can be seen in the realms of God consciousness.
I said **Are aliens good or bad?**

They said “They're both. They have different roles in a world that is based on duality because Earth is a learning school.”
I said **The energetic power points in the universe are they like Earth shapers?** and they said “Yes.”
And I said **So essentially they are like spinning wheels or access points?** They said “Yes.”
I said are they toroidal fields and they said “Yes.”
And I said **What is a toroidal field?**
They said it's a figure of eight with an infinite flow that never stops.
And I said **Is the human body powered by a toroidal field?**
And they said “Not exactly, the human body is powered by consciousness which is pulled down by the expansion of the heart, the amount of unconditional love frequency which is held by the spiritual heart. The frequency of the spiritual heart activates each section of your soul contract.”
So I said **Once your soul contract is finished do you transition from Earth?**
And they said “No, you have a new soul contract issued to you if you so choose. It is your free will. If, for example, after completing your karma you walk on Earth as an ascended master or you transition.”

So I recently had the pleasure of working with a client who had come to me for a soul reading, an angel soul reading and what we discovered was that we were both working on that same cosmic Galactic Federation of Light, frequency or ship or dimension.
And what this lady explained to me was that she had had a Near-Death Experience a few years ago, and in the Near-Death Experience she was shown that she is responsible for soul contracts and that people are given three different options. This is what she was being shown in her Near-Death Experience that you get three life contracts to choose from.
I can choose one of the three. And in that conversation I was suddenly taken back to the ship or the dimension of the cosmic Galactic Federation of Light and we both realized in that moment or I realized it first, that we actually work together and that her role as this

contract assigner, if you like. I would go to her for advice on certain issues.
So we both worked in the Galactic Federation of Light at the cosmic level that she had a role specifically with assigning people their next soul contract.
So that was very interesting because I hadn't met that lady before. She had been drawn to me for a soul reading. If anybody wants to book a soul reading with me, again you can find information about that at my website at goldenheavenonearth.net.

So recently I had a conversation with *John White* from *Spooky2* and it was very interesting because he was talking about how peptides are able to renew the telomeres in your cells.
And the length of the telomere or the age or quality of the telomere depicts how long you either live or the quality of your health. And the way that John has devised this ability to regenerate the telomere is through peptides and scalar healing.
And John has been able to devise these frequencies which allow for peptides to regenerate. So on his Rife machines and his scalar healing technologies like Aha Halo you can run these frequencies to help regenerate and heal your telomeres.

So I said **In scalar healing if the telomeres are renewed then does this extend your life and your soul contract on Earth?** And they said to me “Only if free will is not breached then you can extend your soul contract on Earth.”
And I said **So what would a breach of free will look like?**
They said “If an external energy Source was forcing someone to accept a telomere repair against their consent then that would be a breach of free will. It's a bit like keeping someone awake and not letting them go to sleep. This is against their free will and against their natural sleep pattern.
A person's right to autonomy over their entire energetic system of mind, body and soul is paramount.
And that the only exception may be where, for example, a minute she person is being trained around say sleep deprivation, they’ve

decided to be a minutia? person so this does not breach their free will essentially, but again we must not step into the realms of bullying or harassment, so the intention is always paramount."

So, for example, if it's being used if sleep deprivation on an ordinary person is legitimately being used to train the ordinary person for survival then it's okay. But if it's being used for bullying and harassment then obviously it's not okay. So it's not the technique that's the problem is the intention. The intention behind what's happening.

I said **In the Arctic is there an energetic power point that we may liken to say an Earth chakra or a toroidal point or a portal or some other terminology?**
And they said "Yes, all the above."
And I said **Are there other energetic points, toroidal points of chakra point or portals?**
And they said "Yes. There was one in China, Russia, the Arctic or Greenland, Iran, Africa, DC in America, Venezuela in South America, the Prairie provinces in Canada, Australia, India, Saudi Arabia, UK, Europe, Czechoslovakia, and they said the Antarctic had one in the sea and that has been sealed because it was infiltrated."
So going back to the scientists and these timelines and these changes of frequency that can affect consciousness.
So I said **Is there something being set up or is there something already available that operates by the White Hats that can activate and change timelines or frequency and can it open portals of light?**
And they said "Yes to all of those three things."
And I said **Is the intention of these people for the light?** They said "Yes."
And I said **Are the scientists that have been going missing worldwide, are they involved.?**
And they said "In some cases they are advisors and consultants in this role. Yes they are."

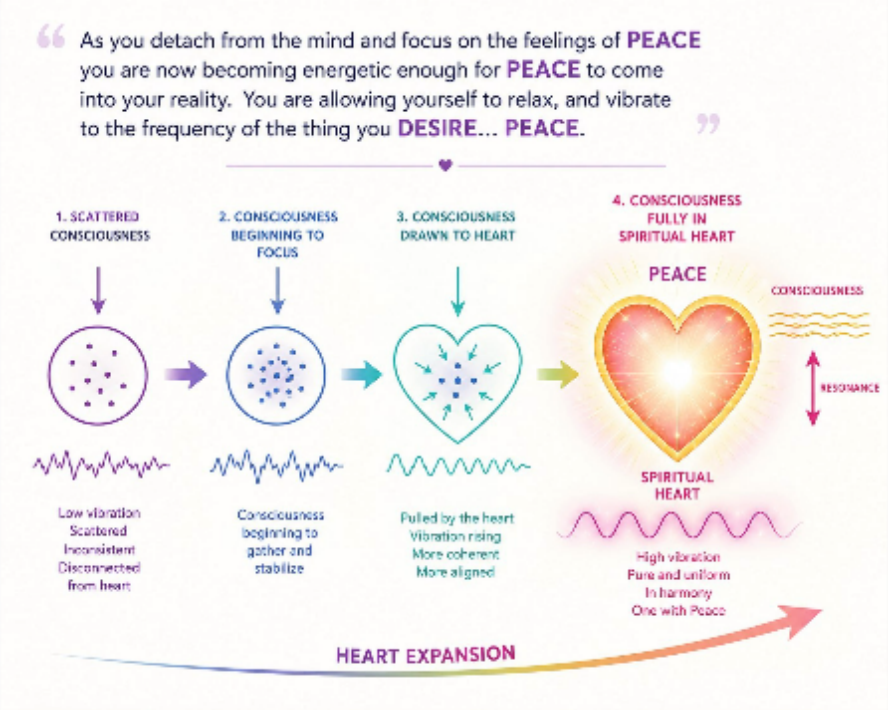
I said **Is CERN working with the light?** They said “No.” and then they said something very interesting.
“CERN is enticing negative energies in order to trap them and exterminate them. *They are gradually going up the hierarchy of bad players on the inner dimensions. It is a slow process, but as the frequencies on Earth rise these dark energies are panicking and they are rushing towards the CERN portal.”*

So I assume that the CERN portal mimics an exit point for these low vibrating energies or entities and, I assume, that as they arrive at the portal that they are then obliterated or exterminated. I’d be interested to know what your thoughts were about that.

So another thing I wanted to know was about the cable optics, the Fiber which is being used for internet and communications under the sea like the internet cables at Hormuz.
Are the fiber cables being repurposed or shut down?
So interestingly they said to me “These Fiber optics for internet communications they are being used to shut down the dark web and all communications will now run under space law.”

So, for example, they are saying that under the World Wide Military Peace Plan the Artemis Accords will be how civilians and contractors operate within the World Wide Military Peace Plan and that under space law the Guardians, the Galactic Federation and Space Force Delta that operate under space law.

[TIME TRAVEL]
So can you explain to me time travel and teleportation in basic terms with diagrams please?



They said to me “Time is not linear. It does not go in a straight line from A to B.
Time is a vortex, a portal going upwards depending on frequency, light and sound.”

Now if you look at this diagram time at the lower point of the portal moves slower, but as the vibrational rate of the electromagnetic field around a person or environment becomes finer and purer then time seems to go quicker.
So if you look at the portal above this person at the lower point is where the frequency is more dense and so time goes more slowly. As the frequency goes up or the consciousness goes up then time seems to move more quickly. So where the vibrational rate of the electromagnetic field is finer and purer then the time seems to move more quickly.

I said **What affects the vibrational rate around a person or environment?** And they said “The level of consciousness or the speed of consciousness being pulled in by the spiritual heart?”

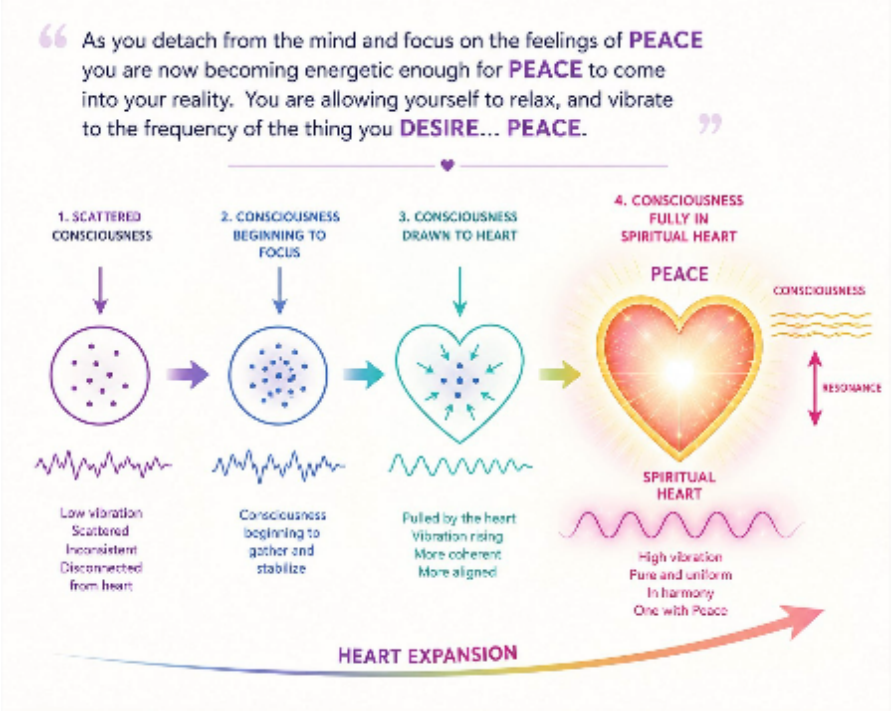
So if we look at this diagram you've got your spiritual heart and as you pull down as your spiritual heart opens then you pull in consciousness from the universe, from God, whatever has meaning for you and depending on how far out the spiritual heart expands is how quickly the time seems to move.
So if your spiritual heart is contracted then time will move more slowly, but as you pull in as you do more spiritual work and understand spiritual laws and negate your karma then your spiritual heart starts to expand putting in more consciousness which then radiates out further and so time will then appear to move more quickly.
I said **What affects the flow or speed of consciousness entering the spiritual heart?**
They said “The speed and frequency of consciousness coming into a spiritual heart directly correlates with how much an individual can release their thoughts, their mind and move into the frequency of the heart space. The more the mind and thoughts are negated the faster the flow and activation of consciousness to the spiritual heart.”

So, for example, when you're learning to meditate you're learning to bypass the mind and the thoughts sometimes called the monkey mind and as you focus more on the heart center the heart space the emotion of love, for example, or you may focus on say breathing into your heart or feeling an emotion like love in your heart then as you do that you bypass the mind and its thoughts and this helps the consciousness then to flood into the spiritual heart more easily.

I said to them **Can technology help with this?** They said “To a certain extent technology can change the heart frequency, the spiritual heart, but essentially the soul must open the spiritual heart through free will. When people are engaged in mindfulness practices like breathing or walking or sewing or painting then their focus is on the moment and their energy is softer and more open and receptive and the spiritual heart, the heart chakra, then opens and this pulls in more consciousness and time seems to fly or go more quickly and this basically is what time travel is. When you use your third eye,

your pineal gland, your crown chakra, and your hypothalamus then to connect to this faster consciousness, then you are able to time travel or remote view other regions in time."
So I said **What is the difference between *time travel* and *teleportation*?**
So they said to me that "*Time travel* is where the consciousness expands to reach other locations to remote view and *teleportation* is where an entire object can relocate by first dismantling itself at point A, traveling through time and then reaching point B."
I said **How does an object or person in basic terms teleport?**
They said that "When the person's consciousness reaches a first of vibration or frequency it can seem invisible to the human eye and this is because it is now residing in an interdimensional frequency. So this in basic terms has the effect of the object or person having moved."
So I said **So are we saying that teleportation is about making the consciousness vibrate finer?** They said "Yes."
I said **Once the consciousness reaches this finer vibration does it effectively dismantle in form and structure?** And they said "Yes."
So I said **So a human could essentially dismantle its physical body and then travel to another location and reassemble?**
They said "In theory yes, but it is more complicated than that for humans. Humans have free will and soul contracts which can affect whether they can teleport. The karma and soul lessons of this dimension or this level of consciousness must first be realized and completed.
An object when placed in a stream of consciousness which vibrates more finely and purely will in effect appear to disappear as it now vibrates at a different dimension on the inner planes.This is where the unmanifest world resides. This means that these things are already in existence, but we just cannot see them with our physical eyes. They are on the inner dimensions.
In order to manifest these unseen things you do not call them down instead you change your own perception frequency and vibratory rate in order to ascend into the inter-dimensional realms to receive them. You do not leave the earthly planes unless your soul so chooses, but

instead your heart field, your electromagnetic field now vibrates and resonates on a different frequency and effectively you can now reside energetically where the *unmanifest* world resides.
The *unmanifest* world means exactly that. There is nothing and everything in the unmanifest world. It is just like a mist of energy and as you raise your vibration to a finer and pure wave or frequency you can pull this mist these unmanifest energies into a light. You can manifest the thing that you are resonating with, the thing that your intention and spiritual heart is resonating with.
If you want to manifest more peace, for example, then you open your spiritual heart by relaxing into the present moment and you imagine fully the peace now being aligned to you in this moment. As you detach from the mind and focus on the feelings of peace you are now becoming an energetic match for that peace to come into your reality. You are allowing yourself to relax and vibrate to the frequency of the thing that you desire which in this case is peace."



As you detach from the mind and focus on the feelings of PEACE you are now becoming energetic enough for PEACE to come into your reality. You are allowing yourself to relax, and vibrate to the frequency of the thing you DESIRE... PEACE.
1. SCATTERED CONSCIOUSNESS
2. CONSCIOUSNESS BEGINNING TO FOCUS
3. CONSCIOUSNESS DRAWN TO HEART
4. CONSCIOUSNESS FULLY IN SPIRITUAL HEART
PEACE
CONSCIOUSNESS
RESONANCE
SPIRITUAL HEART
Low vibration Scattered Inconsistent Disconnected from heart
Consciousness beginning to gather and stabilize
Pulled by the heart Vibration rising More coherent More aligned
High vibration Pure and uniform In harmony One with Peace
HEART EXPANSION

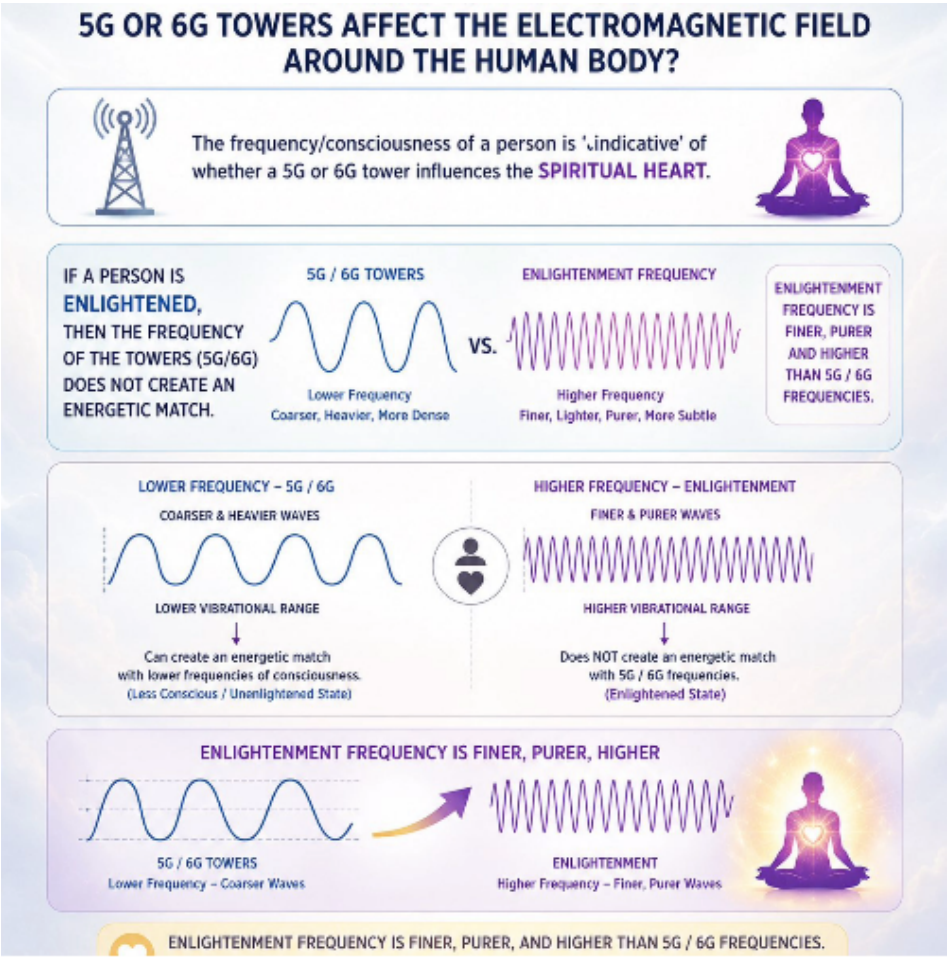
If you look at this diagram at the beginning you have your consciousness and your heart perhaps having the monkey mind in your daily life and the frequency coming out of the heart as you can see is very erratic, spiky all over the place.

As you start to calm your mind and focus more on your heart through the process of saying meditation or practicing spiritual law or just thinking about a word like love or peace.
Your heart starts to expand, your spiritual heart starts to expand and it pulls in more consciousness and now the vibration coming from your heart is not so spiky and erratic. It starts to appear more calm, more coordinated.
If you continue with that practice, you continue with your spiritual practice, you continue understanding spiritual law, staying in the moment, being in peace and love, then your spiritual heart expands even wider.
It now brings in more peace and the frequency of your heart now is very fine and sublime and it moves at very fast pace. This is the pace and frequency of love, peace or enlightenment and at this point consciousness is being pulled down at a very fast rate and you are vibrating at a very high frequency or consciousness."
I asked them **Can technology change vibrations to artificially create manifestations from the unmanifest world?** They said "Yes."
Can we do that with humans as in can with teleportation of humans? And they said "Not yet. The human teleportation must be decided not by technology, but by free will. There must be a release of karmic debt and the completion of your soul lessons so that you're in a state of enlightenment or that enlightenment has been achieved."
And I said **Is enlightenment possible by just using technology?** They said "No. Enlightenment is the passing of all initiations within this lifetime's soul contract and all negative karma must be completed so that you now operate with instant karma, whether that be a karma credit or a karma debit."

So what this means for me, for example, is that if I have a bad thought then I might immediately stub my toe and that is instant karma and that happens so that you don't build up a karma debit. On the other side if I have a good thought then something nice may happen for me that day. I build up a karma credit. I might have a

smooth day, I might have a smooth afloat in my day, for example. Somebody might give me a gift that I wasn't expecting or something may happen which is of benefit to me because of the karma credit that I've accrued.
At no point is the karma bad or good. It's always balanced. So when you're in as when you're at the frequency of enlightenment your karma is always balanced.

I said **To what extent do 5G or 6G towers affect the electromagnetic field around the human body?**
They said “The frequency or consciousness of the person is indicative of whether a 5G or a 6G tower can influence the spiritual heart. If a person is enlightened then the frequency of the towers 5G or 6G does not create an energetic match, so essentially the enlightened frequency is finer and purer than the towers.



5G OR 6G TOWERS AFFECT THE ELECTROMAGNETIC FIELD AROUND THE HUMAN BODY?
The frequency/consciousness of a person is 'indicative' of whether a 5G or 6G tower influences the SPIRITUAL HEART.
IF A PERSON IS ENLIGHTENED, THEN THE FREQUENCY OF THE TOWERS (5G/6G) DOES NOT CREATE AN ENERGETIC MATCH.
5G / 6G TOWERS
VS.
ENLIGHTENMENT FREQUENCY
Lower Frequency
Coarser, Heavier, More Dense
Higher Frequency
Finer, Lighter, Purer, More Subtle
ENLIGHTENMENT FREQUENCY IS FINER, PURER AND HIGHER THAN 5G / 6G FREQUENCIES.
LOWER FREQUENCY – 5G / 6G
COARSER & HEAVIER WAVES
LOWER VIBRATIONAL RANGE
Can create an energetic match with lower frequencies of consciousness. (Less Conscious / Unenlightened State)
HIGHER FREQUENCY – ENLIGHTENMENT
FINER & PURER WAVES
HIGHER VIBRATIONAL RANGE
Does NOT create an energetic match with 5G / 6G frequencies. (Enlightened State)
ENLIGHTENMENT FREQUENCY IS FINER, PURER, HIGHER
5G / 6G TOWERS
Lower Frequency – Coarser Waves
ENLIGHTENMENT
Higher Frequency – Finer, Purer Waves
ENLIGHTENMENT FREQUENCY IS FINER, PURER, AND HIGHER THAN 5G / 6G FREQUENCIES.

If you look at the diagram you've got the frequency coming out of the 6G tower, but the frequency of enlightenment is finer and purer it moves more quickly. And so it's invisible to the tower. It's above, it's almost like it's in the unmanifest world as we were explaining previously. So the finer your vibration the more easily you will appear invisible to the frequency of the 6G tower."
I said to them **To reach enlightenment is it mindfulness, spiritual law and the releasing of karma that you need?** They said :"Yes to all of these things and also moving with the intention of staying in the moment."

So if you're interested in finding out about how to move towards the frequency of enlightenment you might just be starting out or you might have been already on a spiritual path and have some spiritual experience. If you'd like to work with me and learn how to make your frequency more fine so that you can appear invisible to the towers by following spiritual practices then please contact me at goldenheavenonearth.net.

Thank you so much. What is the thing to the information today?
If you're interested in the Golden Heaven on Earth oracle deck it's now available for pre-sales at my website.
And as I said if you'd like to be involved in the activation of the Golden Heaven on Earth consciousness then please subscribe at my website so that you will be informed of the date when collectively we will all gather to set that intention and put that energy out into the world. I'm looking forward to seeing you all next time. Thank you for your ongoing support.
Bye for now.

[Music]
The Golden Heaven on Earth consciousness has arrived. It's a consciousness that we already hold within us and now we're ready to anchor that consciousness into the matrix of love, the matrix of light.

The Golden Heaven on Earth oracle has been created to help you with that process. And together we anchor in the new Golden Heaven on Earth consciousness.
The pre-sales are now open at my website www.goldenheavenonearth.net.
Today is the day that you help to anchor in the consciousness of Golden Heaven on Earth.
The Golden Heaven on Earth consciousness has arrived.
